Manufacturing Day is a celebration of modern manufacturing meant to inspire the next generation of workers. Our goal is to provide opportunities for 2,000 high school students to see the industry in action and meet people who make things.

Be a Host!

Why?
- Fewer students are exposed to careers in this field
- Highlight career opportunities
- Inspire the future workforce to take the place of retiring baby boomers

What is involved?
- Agree to host a tour for up to 30 students (morning, afternoon or both)
- Prepare a company overview to share with students
- Recruit employees to talk about their jobs and the training they received

Help provided? You bet!
- Ideas for organizing your tour
- Opportunity to meet school personnel before they arrive with students
